EUROPEAN FORUM GAS 2009

in Madrid

18th and 19th June 2009

Close to the opening of its 7th edition, the EFG's Organization invites gas experts, universities, and suppliers of the Gas Industry from all over Europe to attend the European Gas Forum for exchanging and discussing the current technical issues concerning the European Gas Industry.

Under the slogan Matching Quality, Efficiency and Safety: a true challenge!, the 7th edition of the Conference will be mainly dedicated to quality control of gas installations and competence assessment of gas operatives, essential to guarantee the safety of gas utilization as well as to show the new trends on high efficiency gas appliances and best materials for gas networks also fundamental to promote the image of gas as a safe and sustainable energy.

The Conference Programme will include the following sessions:

- **Quality and safety of gas installations**
- **High efficiency gas appliances for a sustainable energy use**
- **Best materials for a safe and reliable gas grid**
- **Technical challenges due to liberalization**

The main European gas companies and universities will provide speakers for the different sessions.

A keynote speech on the operation of the Spanish Gas System will be addressed by the Director General of Strategy and Regulation of Enagas, Mr. Juan Pons.

The EFG Steering Committee is pleased to include in the programme a technical visit to the Repsol's Technology Center (RTC). Additional information on the RTC is available on: http://www.repsol.com/es_en/todo_sobre_repsol_ypf/conocer_repsol_ypf/innovacion_y_tecnologia/centros_de_tecnologia/ctr/default.aspx

Programme of EFG 2009

The complete programme, registration and general information are available on: www.efg2009.com.

Registration

Registration on line is available on the official EFG 2009 website: www.efg2009.com.
