

## SESSION 1: Wrap-up & Discussion

# “Quality and Safety of Gas Installations”

ir.Hella Rijpkema

# Wrap up

- This session presented different schemes for ensuring Quality & Safety of gas installations
- From compulsory systems to self inspection
- From proven technologies to new

# Discussion

- **Will it be possible to define a common European Scheme for competency assessment for gas installers?**
  
- **In view of:**
  - **Availability of natural gas and other fuels**
  - **Sustainability**
  - **Technological developments**
  - **Economic conditions & free movement of services**
  - **Energy efficiency**

# Discussion

## How to deal with this Challenge?

# Conclusion: session 1

## Quality and Safety of gas installations

### A common European scheme:

- Long way to go: keep things going & stay in contact
- Start with new installations: define the needs
- Define a minimum level of skilled staff
- Develop a practical framework

**“a true challenge ”**
